Introduction

Museum of the Moving Image’s Sloan Science & Film initiative provides opportunities for the creation, distribution, exhibition, and discussion of films that amplify understanding of scientific themes. This guide offers a teaching framework for 52 short, narrative (fiction) films, each of which integrates scientific or technological themes. These films are freely available to stream at scienceandfilm.org. The goal of this guide is to help teachers engage elementary, middle, and high school students in STEM learning through film. Some facts about the guide:

- Films range from 5 to 33 minutes, averaging 15 minutes in length.
- Subjects include astronomy, biology, chemistry, climate science, ecology, evolution, genetics, mathematics, physics, psychology, technology, and the history of science. Each film is listed under its primary scientific subject, and in some cases cross-listed with a secondary subject.
- Each film is correlated with Next Generation Science Standards (available here).
- Included with each film are proposed discussion questions and resources for further engagement.
- We advise teachers to screen all films in advance of sharing them with students, but especially those marked with “mature content advisory.”

The films in this guide were made with support from the Alfred P. Sloan Foundation, whose nationwide film program aims to encourage filmmakers to create more realistic and compelling stories about science and technology and to challenge existing stereotypes about scientists and engineers in the popular imagination. Over the past two decades, Sloan has partnered with leading film schools to support the production of the short films featured in this guide.

ACKNOWLEDGEMENTS

Into the Void; Starry Night

Clarity; Hot Air; A Lucky Man; Sin Dolor; Standing;

Stealth

The Collector’s Gift; Crick in the Holler; Haber; Paprika; Sweet Potatoes; Yellow Rain

Bird in Hand; Concrete; The Loneliest; Passerine: A Bird Duet

Cairn; Flood; Wild Love

Love Chance; Nzara ’76; XP; Visible Proof

The Rain Collector; Semmelweis; Skylab; Through the Air to Calais

Chasing Patterns; Variables

For All Mankind; Hardbat; A Hole; Jornada Del Muerto; The Monster and the Peanut;

Signal; Stella for Star

Atrocity; Cradle; In Vivid Detail; The Reality Clock; Remembrance; The Witness

App; The Chef; The Code of Family; The King’s Pawn; Spark; Temma;

Three Light Bulbs; Without Fire
INTO THE VOID  (Click here to watch)
2018, 20 minutes

AGE GROUP: Middle school and older

STANDARDS: NGSS: Grades 6-12, Earth’s Place in the Universe
(ESS1.A: The Universe and Its Stars)

SUMMARY: Budding astronomer, wife, and young mother Vera Rubin prepares to present her new, groundbreaking research to the American Astronomical Society. However, she discovers a prejudice that runs much deeper than she thought.

QUESTIONS TO EXPLORE: What are the most significant discoveries Vera Rubin made about the universe? How did Vera Rubin discover dark matter? How have her revelations contributed to what we know today about the universe? How was Vera Rubin put at a disadvantage by her peers and the scientific community?

RESOURCES:
Seeing dark matter classroom activity guide:

How Vera Rubin discovered dark matter:

STARRY NIGHT  (Click here to watch)  
2013, 20 minutes

AGE GROUP: Middle School and higher

STANDARDS: NGSS: Grades 6-12, Earth’s Place in the Universe (The Universe and Its Stars, ESS1.A)

SUMMARY: Starry Night is the story of Dawn, a teenage girl trying to escape her small town to pursue her passion for astronomy.

QUESTIONS TO EXPLORE: What tools do astronomers use? According to Starry Night, what are variable stars? How do astronomers measure the distance between objects in the solar system?

RESOURCES:
An explanation of variable stars and where to find them: https://www.aavso.org/variables-what-are-they-why-observe-them

Edited by Paxton Farrar and William Pierce
Cast: Paige Hiskey, Brian Combs, Joe Lambright, Frank Lawler, Shondale Seymour
Funded by an NYU-Sloan Production Grant
CLARITY (Click here to watch)
2015, 20 minutes

AGE GROUP: High school

SUMMARY: A story of obsession, power, and discovery centering around a maverick neuroscientist, her doting pupil, and an alluring machine that could revolutionize brain science.

QUESTIONS TO EXPLORE: Why were Ana and Samantha having such a difficult time using mice to test their machine? What are neurons and why are they so important? How does the brain interact with the nervous system? What is the challenge with creating a map of the entire human brain?

RESOURCES:
Neuroscience classroom information and activities based on grade level:
http://brainu.org/neuroscience-concepts-activities-grade-level-high-school-grades-9-12

Information on the different types of neurons, and their role in the brain and nervous system:

**HOT AIR**  (Click here to watch)
2019, 14 minutes

**AGE GROUP:** Middle School and older

**STANDARDS:** NGSS: Grades 6-12 Earth and Human Activity

**SUMMARY:** It was 1856 when Eunice Newton Foote made a monumental discovery in climate science. Today, we know her work, but not her name. This is her story.

**QUESTIONS TO EXPLORE:** What were the methods Eunice Newton Foote used to conduct her experiments on greenhouse gases? What is Eunice Newton Foote’s legacy? What are some of the most significant sources of greenhouse gas emissions today? What can we do to mitigate the effects of greenhouse gases?

**RESOURCES:**
The legacy of Eunice Newton Foote:

Greenhouse effect classroom demonstration:
https://mrcc.purdue.edu/resources/guides/HowTo_GreenhouseEffect.pdf

Additional background info about Eunice Newton Foote, and how she conducted her experiments:

Sources of greenhouse gas emissions:

Cast: Katherine LaVictoire, Ethan Averton, Peter Xifo
Funded by a USC-Sloan Production Grant
A LUCKY MAN  (Click here to watch)
2014, 16 minutes

AGE GROUP: High school *Mature Content Advisory*

STANDARDS: NGSS: Grades 9-12, Ecosystems: Interactions, Energy, and Dynamics (LS2.D: Social Interactions and Group Behavior)

SUMMARY: The star quarterback of a college football team wakes up with no memory of what happened during a party the night before. His search yields undesired knowledge about the body of a man—but gives him answers that he ultimately needs to accept.

QUESTIONS TO EXPLORE: What are common side effects linked to PTSD for men? Why is it controversial for a man to be sexually violated by a woman? What is the physiological basis for arousal?

RESOURCES:
Interview with writer/director Anna Gutto:
http://scienceandfilm.org/articles/2998/a-lucky-man-writer-and-director-anna-gutto

Funded by a Columbia University-Sloan Production Grant
**BIOLOGY**

**SIN DOLOR**  (Click here to watch)  
2011, 20 minutes

**AGE GROUP:** High school  
**STANDARDS:** NGSS: Grades 9-12, From Molecules to Organisms: Structures and Processes (LS1.A: Structure and Function), Heredity: Inheritance and Variation of Traits (LS3.B: Variation of Traits)

**SUMMARY:** A doctor discovers that a patient of his can’t feel pain.

**QUESTIONS TO EXPLORE:** What is the neurological basis behind an inability to feel pain? How did Dámaso's "gift" turn out to be a curse? Why is pain important?

**RESOURCES:**

Medical description of Dámaso’s condition:  
https://rarediseases.info.nih.gov/diseases/12267/congenital-insensitivity-to-pain

How an inability to feel pain is harmful to people across the world:  

How the body and the brain interpret pain:  

**CREDITS:**

Written by Derek Simon

Funded by an NYU-Sloan Production Grant
STANDING8 (Click here to watch)  
2014, 15 minutes

AGE GROUP: High School *Mature Content Advisory*

STANDARDS: NGSS: Grades 9-12, Heredity: Inheritance and Variation of Traits (Structure and Function, LS1.A)

SUMMARY: In the months between beating an opponent to death in the ring and battling for the next title, a journeyman boxer, Abdul Gillings, is forced to examine if he can survive the sport. Abdul is preparing for the biggest fight of his career. But, when a neurologist suspects a chronic brain injury, she hesitates to sign Abdul’s health certificate, threatening his chances of becoming a champion.

QUESTIONS TO EXPLORE: What are the symptoms of Chronic Traumatic Encephalopathy (CTE)? Why is CTE so difficult to diagnose? What areas of the brain are affected in CTE?

RESOURCES:  
An overview Chronic Traumatic Encephalopathy (CTE):  

How CTE affects the brain:  

Premiere of Standing8:  
http://scienceandfilm.org/articles/2735/premiere-michael-molina-minards-standing8

THE COLLECTOR’S GIFT (Click here to watch)
2011, 8 minutes

AGE GROUP: Elementary School and higher

STANDARDS: NGSS: Grades K-12, Matter and Its Interactions (Structures and Properties of Matter, PS1.A)

SUMMARY: A young girl pieces together the journey of a man who once tried to gather all of the elements of the periodic table.

QUESTIONS TO EXPLORE: What is a chemical element? What distinguishes one element from another on the periodic table? Who are some of the key people who discovered the elements?

RESOURCES:
The stories of people who helped develop the periodic table:
http://www.rsc.org/periodic-table/history/about

A program about where the elements on the periodic table come from:
http://www.pbs.org/wgbh/nova/physics/hunting-elements.html

A lesson plan and educational videos about the elements:

Funded by a USC-Sloan Production Grant
CRICK IN THE HOLLER

2016, 18 minutes

AGE GROUP: High school

STANDARDS: NGSS: Grades 9-12, Earth’s Systems
(ESS2.C: The Roles of Water in Earth’s Surface Processes), Earth and Human Activity (ESS3.C: Human Impacts on Earth Systems)

SUMMARY: During West Virginia’s 2014 Elk River chemical spill, a first-generation college student charged with the care of her rebellious younger sister instead becomes consumed by an issue with their water supply.

QUESTIONS TO EXPLORE: What is MCHM and why is it harmful? What are the symptoms and effects of ingesting MCHM? What is MCHM typically used for? What are the ways in which water can be contaminated, chemically or otherwise? What are the methods of preventing contaminants from entering water supply?

RESOURCES:
Information about MCHM:

Learning chemical compounds classroom activity:
https://www.acs.org/content/dam/acsorg/education/outreach/kidschemistry/activities/chemistry-name-game.pdf

Information and background on the Elk River Chemical Spill:
https://www.cwp.org/why-we-should-remember-the-elk-river-spill/

**HABER** ([Click here to watch](#))
2008, 33 minutes

**AGE GROUP:** High School

**STANDARDS:** NGSS: Grades 9-12, Matter and Its Interactions (Structure and Properties of Matter, PS1.A; Chemical Reactions, PS1.B); Ecosystems: Interactions, Energy, and Dynamics (Cycles of Matter and Energy Transfer in Ecosystems, LS2.B); Earth and Human Activity (Natural Resources, ESS3.A; Human Impacts on Earth Systems, ESS3.C; Developing Possible Solutions, ETS1.B)

**SUMMARY:** Fritz Haber was a brilliant German-Jewish chemist with one of the most amazing dual legacies in history. His revolutionary process for creating synthetic fertilizers averted the greatest overpopulation crisis the world has ever known and won him a Nobel Prize in 1918. However, Haber used his genius to create the first chemical weapon, which was used during World War I.

**QUESTIONS TO EXPLORE:** How is ammonia made and what are some of its practical uses? What were Fritz Haber’s contributions to the military? What is Fritz Haber’s legacy?

**RESOURCES:**
A teacher’s guide to Haber: [http://www.haberfilm.com/PDFs/HABER-TeacherResources.pdf](http://www.haberfilm.com/PDFs/HABER-TeacherResources.pdf)

A brief history of chemical warfare: [https://www.chemheritage.org/distillations/article/brief-history-chemical-war](https://www.chemheritage.org/distillations/article/brief-history-chemical-war)
**PAPIKA** *(Click here to watch)*

2004, 7 minutes

**AGE GROUP:** Elementary School and higher

**SUMMARY:** *Paprika* celebrates the Hungarian scientist Albert Szent-Györgyi who received a Nobel Prize in 1937 for his work on the isolation of Vitamin C.

**QUESTIONS TO EXPLORE:** Who was Albert Szent-Györgyi? How does the body digest Vitamin C? Why is Vitamin C important for healthy bodily functions?

**RESOURCES:**
- A factsheet about Vitamin C: [https://ods.od.nih.gov/factsheets/VitaminC-HealthProfessional/](https://ods.od.nih.gov/factsheets/VitaminC-HealthProfessional/)
- The history of the discovery of Vitamin C: [https://www.acs.org/content/acs/en/education/whatischemistry/landmarks/szentgyorgyi.html](https://www.acs.org/content/acs/en/education/whatischemistry/landmarks/szentgyorgyi.html)
SWEET POTATOES (Click here to watch)
2018, 30 minutes

AGE GROUP: High school

SUMMARY: Mexico City, 1951. After synthesizing the main component of the contraceptive pill, young scientist Luis Miramontes deals with the religious and personal consequences of his groundbreaking invention.

QUESTIONS TO EXPLORE: What was the role of sweet potatoes in Luis's discovery? Why didn't Luis receive proper recognition for his work? How do contraceptive pills work?

RESOURCES:
Information on Luis Miramontes and why he didn't receive the appropriate credit for his work: https://www.sciencenews.org/article/luis-miramontes-chemistry-birth-control-pill-ingredient-sexual-revolution

How the pill works: https://www.pbs.org/wgbh/amERICANEXPERIENCE/features/pill-how-pill-works/

**YELLOW RAIN** *(Click here to watch)*
2014, 21 minutes

**AGE GROUP:** High School

**STANDARDS:** NGSS: Grades 9-12, Matter and Its Interactions (Chemical Reactions, PS1.B); Earth and Human Activity (Human Impacts on Earth Systems, ESS3.C)

**SUMMARY:** Near the end of the Cold War, the U.S. government received numerous reports from Southeast Asia of chemical weapons being used against democratic insurgents. After investigating, the U.S. accused the Soviets of supplying chemical weapons to the communist governments in the area. Matthew Meselson, a Harvard molecular biologist, reviewed samples of the substance but was unconvinced that what the U.S. government found was a weapon. Meselson traveled to Thailand with Thomas Seeley, a renowned animal behaviorist, to prove that the yellow substance falling from the sky was not a chemical weapon but a natural phenomenon.

**QUESTIONS TO EXPLORE:** What is the difference between a virus, bacteria, and toxin? How are biological weapons used and detected? Who was Matthew Meselson and what was his most important scientific contribution?

**RESOURCES:**
A history of biological warfare: [https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1326439/](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1326439/)

**ECOLOGY, ORNITHOLOGY**

**BIRD IN HAND** ([Click here to watch](#))
2004, 17 minutes

**AGE GROUP:** High School

**STANDARDS:** NGSS: Grades 9-12, Ecosystems: Interactions, Energy, and Dynamics (Interdependent Relationships in Ecosystems, LS2.A; Social Interactions and Group Behavior, LS2.D); Biological Evolution: Unity and Diversity (Natural Selection, LS4.B)

**SUMMARY:** A struggling adolescent draws inspiration for her own music from working in a laboratory that studies how birds learn their songs.

**QUESTIONS TO EXPLORE:** Why do birds sing? What happens when a bird is raised in isolation? How do scientists record birdcalls?

**RESOURCES:**
The Cornell Lab Bird Academy on bird songs: [https://academy.allaboutbirds.org/birdsong/](https://academy.allaboutbirds.org/birdsong/)

**CREDITS:**
Written, Directed, and Edited by Janet McIntyre
Produced by Liz Foley and Dan Meisel
Cast: Eden Durbin Schwartz, Greg Shamie
Funded by an NYU-Sloan Production Grant
CONCRETE (Click here to watch)
2000, 14 minutes

AGE GROUP: Elementary School and higher

SUMMARY: The juxtaposition of New York City’s concrete with lush greenery inspired Concrete, a film about a botanist who decides to make a garden behind his apartment building.

QUESTIONS TO EXPLORE: What does a botanist study? What kinds of plants thrive in a city and why? What are some negative impacts humans have on the environment where plants grow?

RESOURCES:
A selection of lesson plans about plants growing in a variety of environments:
http://www.nybg.org/edu/teacher/lesson-plans.php

A working list of all plant species:
https://wfoplantlist.org/plant-list

An outline of the field of botany:
http://www.botany.org/bsa/careers/car-what.html

An explanation of phytoremediation:
https://www.epa.gov/sites/default/files/2015-04/documents/a_citizens_guide_to PHYTOREMEDIATION.pdf
THE LONELIEST  
(Click here to watch)
2014, 10 minutes

AGE GROUP: Middle School and higher

STANDARDS: NGSS: Grades 6-12, Inheritance and Variation of Traits (Variation of Traits, LS3.B); Waves And Their Applications in Technologies for Information Transfer (Wave Properties, PS4.A)

SUMMARY: A filmmaker and a marine biologist go looking for the loneliest whale in the world, that has a voice too high for other whales to hear.

QUESTIONS TO EXPLORE: What is the benefit to whales living in pods? How do sound waves travel through water? What is the relationship between a wavelength and its frequency?

RESOURCES: 
Facts and classroom activities about whales: [http://kids.nceas.ucsb.edu/index.html](http://kids.nceas.ucsb.edu/index.html)

An explanation of why whales make sounds: [https://oceanservice.noaa.gov/facts/whalesounds.html](https://oceanservice.noaa.gov/facts/whalesounds.html)

CREDITS: 
Written, directed, produced, and edited by Lilian Mehrel
Cast: Madeline Wise, Gabriele Schafer, Thomas Burns Scull
Funded by an NYU-Sloan Production Grant
**PASSERINE: A BIRD DUET**  
(Click here to watch)

2011, 15 minutes

**AGE GROUP:** High School

**STANDARDS:** NGSS: Grades 9-12, Ecosystems: Interactions, Energy, and Dynamics (Interdependent Relationships in Ecosystems, LS2.A; Biodiversity and Humans, LS4.D)

**SUMMARY:** On a hike in the woods, Darius, a noisy day-hiker, finds himself unwittingly at odds with The Baz, a crusty loner who claims to be an ornithologist in the midst of a delicate experiment.

**QUESTIONS TO EXPLORE:** Where are passerines found and what makes them ecologically significant? How does noise pollution affect bird behavior? How does one become a birder?

**RESOURCES:**
An overview of passerine birds:  

An article about noise pollution and how it affects birds:  
https://bentonswcd.org/effects-of-urbanization-on-birds/

A lesson plan exploring birds’ nest-building:  

**CREDITS:**
Written, Directed, and Edited by Denise Iris  
Produced by Chip Hourihan and Veronica Nickel  
Cast: Jason Odell Williams, Liam Mitchell  
Funded by an NYU-Sloan Production Grant
EVOLUTION, EVOLUTIONARY GENETICS

CAIN (Click here to watch)
2013, 18 minutes

AGE GROUP: High School *Mature Content Advisory*

SUMMARY: Ixtao has always been the most curious Neanderthal in his tribe, so when he comes across an injured creature that he has never seen before—a human child—Ixtao doesn’t hesitate to take him under his wing, much to his tribe’s chagrin.

QUESTIONS TO EXPLORE: What are the similarities and differences between humans and Neanderthals? What are some of the pre-linguistic forms of communication and what made them effective? What tools did the Neanderthals use?

RESOURCES:
An exploration of ancient DNA and Neanderthals: https://humanorigins.si.edu/evidence/genetics/ancient-dna-and-neanderthals
A collection of lesson plans and learning resources about human evolution: https://ny.pbslearningmedia.org/collection/hs11/#.WZyWeZOGN0s
An overview of Neanderthals: https://www.nhm.ac.uk/discover/who-were-the-neanderthals.html

**EVOLUTION**

**FLOOD** [Click here to watch]
2016, 14 minutes

**AGE GROUP:** Middle School and higher *Mature Content Advisory*

**STANDARDS:** NGSS: Grades 6-12, Hereditary: Inheritance and Variation of Traits (Structure and Function, LS1.A); Biological Evolution: Unity and Diversity (Adaptation, LS4.C); Earth’s Place in the Universe (The History of Planet Earth, ESS1.C)

**SUMMARY:** Miriam is an unemployed journalist who has a beat on a story that could turn her bad luck around. For ten years, her dad, Gordon, has lived in the Mojave Desert running a paleontology museum, but Gordon believes that the earth was made in days, people and dinosaurs coexisted, and the fossil record is a result of Noah’s Flood. Miriam ventures west to interview Gordon about what made him a creationist.

**QUESTIONS TO EXPLORE:** What is the job of a paleontologist? How did the dinosaurs become extinct? How do scientists study the origins of the universe?

**RESOURCES:**
A museum guide to fossil and geology collections: [https://www.fieldmuseum.org/science/research/area/fossils-meteorites](https://www.fieldmuseum.org/science/research/area/fossils-meteorites)

**GENETICS**

**XP** (Click here to watch)
2002, 10 minutes

**AGE GROUP:** Middle School and higher

**STANDARDS:** NGSS: Grades 9-12, Heredity: Inheritance and Variation of Traits (Inheritance of Traits, LS3.B); Earth’s Systems (Weather and Climate, ESS2.D)

**SUMMARY:** In XP, a young boy is afflicted with xenoderma pigmentosum rendering him unable to venture outside into the sunlight or endure any sources of UV radiation in the home. He is torn between the admonitions of his mother and doctor, and his wish to live a normal boyhood.

**QUESTIONS TO EXPLORE:** What is xenoderma pigmentosum (XP)? How is XP transmitted? What are some ways to stay protected from UV radiation?

**RESOURCES:**
The causes and symptoms of xenoderma pigmentosum: [https://rarediseases.info.nih.gov/diseases/7910/xeroderma-pigmentosum](https://rarediseases.info.nih.gov/diseases/7910/xeroderma-pigmentosum)

GENETICS, BIOLOGY

VISIBLE PROOF *(Click here to watch)*
2011, 23 minutes

AGE GROUP: High School *Mature Content Advisory*

STANDARDS: NGSS: Grades 9-12, Inheritance and Variation of Traits (Structure and Function, LS1.A)

SUMMARY: Based on the true story of the first murder solved by fingerprint evidence.

QUESTIONS TO EXPLORE: Who were Juan Vucetich and Eduardo Alvarez and what was their major scientific contribution? What can forensic practitioners tell from a fingerprint that they cannot tell from a DNA test, and vice versa? How are fingerprints recorded and classified?

RESOURCES:
History of the fingerprint:
https://www.ojp.gov/pdffiles1/nij/225321.pdf

A lesson plan on using DNA as evidence:

THE RAIN COLLECTOR  
(Click here to watch)
2013, 13 minutes

AGE GROUP: Middle school and older

STANDARDS: NGSS: Grades 6-12, Earth’s Systems
(ESS2.C: The Roles of Water in Earth’s Surface Processes,
ESS2.D: Weather and Climate)

SUMMARY: A young woman in Victorian England finds purpose and
maybe even love through science. Based on the work of the British

QUESTIONS TO EXPLORE: Why did the British Rainfall Organization call
for volunteers of "both sexes; all ages and all classes"? What information
does rain collection give us about our climate and weather? What is
citizen science?

RESOURCES:
Contemporary tools for measuring rainfall:

History of the British Rainfall Organization:

**SEMMELEWS** (Click here to watch)
2001, 21 minutes

**AGE GROUP:** High School

**STANDARDS:** NGSS: Grades 9-12, From Molecules to Organisms: Structures and Processes (Structure and Function, LS1.A); Ecosystems: Interactions, Energy, and Dynamics (Social Interactions and Group Behavior, LS2.D; Developing Possible Solutions, ETS1.B)

**SUMMARY:** In 1847, the Hungarian physician Ignaz Semmelweis discovered that many cases of childbirth fever had been caused by the fact that doctors weren’t washing their hands before treating pregnant women. His findings were spurned by the medical community.

**QUESTIONS TO EXPLORE:** What is the germ theory of disease? Why is hand-washing important? How have hospitals changed since the late 19th century?

**RESOURCES:**
Overview of germs:
https://my.clevelandclinic.org/health/articles/24495-germs

Why handwashing is important:
https://www.cdc.gov/handwashing/why-handwashing.html

Interview with filmmaker Jim Berry:

SKYLAB (Click here to watch)
2005, 12 minutes

AGE GROUP: Middle School and higher

STANDARDS: NGSS: Grades 6-12, Earth’s Place in the Universe (Earth and the Solar System, ESS1.B); Engineering Design (Defining and Delimiting Engineering Problems, ETS1.A)

SUMMARY: An 11-year-old spends the summer of 1979 certain that Skylab, America’s First Space Station—then falling back to Earth, though no expert could say where—is about to land on top of him. It might almost make him less miserable if it did; he is spending the summer with his mother who is planning a second marriage to a guy he can’t stand.

QUESTIONS TO EXPLORE: What were the goals of the Skylab Space Station? What were some of the engineering challenges that the Skylab Space Station faced? What is the International Space Station and what sorts of experiments are conducted on board?

RESOURCES:
History of Skylab: https://www.nasa.gov/missions/shuttle/f_skylab1.html

Teaching resources related to Skylab: https://www.txstate-epdc.net/skylab-from-space-to-your-classroom/

THROUGH THE AIR TO CALAIS  
2008, 17 minutes

AGE GROUP: High School

STANDARDS: NGSS: Grades 9-12, Motion and Stability: Forces and Interactions (Forces and Motion, PS2.A); Energy (Relationship Between Energy and Forces, PS3.C); Engineering Design (Defining and Delimiting Engineering Problems, ETS1.A; Developing Possible Solutions, ETS1.B)

SUMMARY: January 7th, 1785. The birds have dominated the skies and gone relatively unchallenged as rulers of the aerial kingdom...until now. Eccentric French Inventor, Jean-Pierre Blanchard and his American financier, Dr. John Jeffries, are embarking on a journey to become the first men to cross the English Channel in a hydrogen balloon. This unlikely pair is bringing: a set of wings to row through the air, the first bag of international airmail, and a bottle of cognac to celebrate their success. However, before these pioneers of aviation can celebrate, they’ll need to survive the crossing.

QUESTIONS TO EXPLORE: Who was Jean-Pierre Blanchard? What is buoyancy? What are the advantages and disadvantages of using hydrogen for a balloon?

RESOURCES:
An entry on the life and inventions of Jean-Pierre Blanchard: 
http://www.bbml.org.uk/ballooning-history/jean-pierre-blanchard/

A classroom activity building a hot air balloon: 
https://www.nasa.gov/pdf/544372main_PS1_Bag%20Balloon_C1_Final.pdf

**CHASING PATTERNS**  
(Click here to watch)  
2003, 16 minutes

**AGE GROUP:** Elementary School and higher

**STANDARDS:** NGSS: Grades K-12, From Molecules to Organisms: Structures and Processes (Structure and Function, LS1.A)

**SUMMARY:** The young hero of *Chasing Patterns* is lucky enough to have a teacher who encourages his fascination with the patterns he sees in sunflowers and pine cones—a passion that dovetails with his love of narrative, especially a book of Arthurian legends that belonged to his late mother.

**QUESTIONS TO EXPLORE:** What is the Fibonacci Sequence? Where is the Fibonacci Sequence in nature? Why does the Fibonacci Sequence occur so often in the environment?

**RESOURCES:**
How the Fibonacci Sequence was first invented, plus many examples of it in nature:  
[https://plus.maths.org/content/life-and-numbers-fibonacci](https://plus.maths.org/content/life-and-numbers-fibonacci)

How to count spirals:

FOR ALL MANKIND (Click here to watch)
2009, 16 minutes

AGE GROUP: High School

STANDARDS: NGSS: Grades 9-12, Energy (Relationship Between Energy and Forces, PS3.C; Defining and Delineating Engineering Problems, ETS1.A); Earth and Human Activity (Developing Possible Solutions, ETS1.B)

SUMMARY: Johnny Red always wanted to be a scientist and work for NASA. After several academic mishaps, he ends up stuck in his suburban Pennsylvania town. Johnny decides to build a functioning time machine. Instead of using correct science, Johnny decides to base all of his research on action-adventure films of the 1980s and 1990s.

QUESTIONS TO EXPLORE: What is the speed of light? How is it measured? How does the speed of light relate to time travel?

RESOURCES:
Video and supporting materials about measuring the speed of light: https://ny.pbslearningmedia.org/resource/lsp07.sci.phys.energy.lightspeed/speed-of-light/

NASA explains time travel: https://spaceplace.nasa.gov/time-travel/en/

JORNADA DEL MUERTO  (Click here to watch)
1999, 28 minutes

AGE GROUP: High School

STANDARDS: NGSS: Grades 9-12, Matter and Its Interactions (Nuclear Processes, PS1.C)

SUMMARY: Jornada del Muerto is a tale of the psychological cost paid by those who worked on the atomic bomb. A scientist, wracked by guilt over the destruction and death that the bomb will cause, imagines that he has found a poor family living in a shack near the test site’s ground zero.

QUESTIONS TO EXPLORE: What types of scientists and/or mathematicians went to work on the atomic bomb? How does an atomic bomb create such a large explosion? Why is Uranium-235 important in nuclear fission?

RESOURCES:
Historical article on Los Alamos and the Manhattan Project: https://lps.library.cmu.edu/ETHOS/article/id/35/

Native Americans and the Manhattan Project: https://ahf.nuclearmuseum.org/ahf/history/native-americans-and-manhattan-project/

THE MONSTER AND THE PEANUT  
2004, 22 minutes

AGE GROUP: High School *Mature Content Advisory*

STANDARDS: NGSS: Grades 9-12, Motion and Stability: Forces and Interactions (Forces and Motion, PS2.A)

SUMMARY: *The Monster and the Peanut* is about a man who believes the tragic death of his young daughter can be explained by the rules of traffic flow. It suggests that for some people, science (the repository of reason) becomes a substitute religion, which can explain away the troubling uncertainty of the world.

QUESTIONS TO EXPLORE: What principles of physics can be abstracted to relate to traffic flow? What are some changes to the system of traffic flow that could improve a city?

RESOURCES:
Classroom activity on the science of traffic congestion: https://www.teachengineering.org/lessons/view/usf_traffic_lesson01

An article about technologies measuring traffic: https://news.mit.edu/2022/3-questions-meshkat-botshekan-what-single-car-says-about-traffic-0207

An article on the science of traffic jams: https://blogs.scientificamerican.com/cocktail-party-physics/crosstown-traffic/

ATROCITY (Click here to watch)

2004, 7 minutes

AGE GROUP: High School

STANDARDS: NGSS: Grades 9-12, Ecosystems: Interactions, Energy, and Dynamics (Social Interactions and Group Behavior, LS2.D)

SUMMARY: An experiment on obedience to authority conducted at Yale University in the early 1960s, by social psychologist Stanley Milgram, was a shock to the publics' notion of its own goodness. Researchers were astounded by the results, which showed the extent to which subjects would inflict harm on others at the order of the researcher.

QUESTIONS TO EXPLORE: Why did Stanley Milgram’s peers question the ethics of his experiment? What were the lasting psychological effects of Stanley Milgram’s experiment on the test subjects? What did the Milgram experiment demonstrate?

RESOURCES:
Stanley Milgram’s essay "The Perils of Obedience," which explains his experiment:
https://web.physics.utah.edu/~detar/phys4910/readings/ethics/PerilsOfObedience.html

Radiolab episode on the Milgram Experiments:
https://radiolab.org/episodes/180092-the-bad-show

Interview with a psychologist about Milgram’s experiment:

CRADLE  (Click here to watch)
2016, 14 minutes

AGE GROUP: Middle School and higher

STANDARDS: NGSS: Grades 6-12, Biological Evolution: Unity and Diversity (Adaptation, LS4.C; Developing Possible Solutions, ETS1.B); Heredity: Inheritance and Variation of Traits (Structure and Function, LS1.A)

SUMMARY: Cradle focuses on an army veteran’s return home after losing both his arms in Iraq. He has to learn to live with prosthetics and help his wife care for their newborn daughter, but also must adjust to excruciating phantom limb pain.

QUESTIONS TO EXPLORE: What brain areas are involved in generating the perception of a phantom limb? What are some techniques that can help relieve the pain? Why can vision help relieve the pain?

RESOURCES:
An NPR broadcast about phantom limb pain and treatments: https://www.npr.org/2011/02/14/133026897/v-s-ramachandrans-tales-of-the-tell-tale-brain

Animation about phantom limb pain: https://ed.ted.com/lessons/the-fascinating-science-of-phantom-limbs-joshua-w-pate

THE REALITY CLOCK  (Click here to watch)
2011, 7 minutes

AGE GROUP: Middle School and higher

STANDARDS: NGSS: Grades 6-12, Hereditary: Inheritance and Variation of Traits (Inheritance of Traits, LS3.A)

SUMMARY: The Reality Clock is an animated portrait of a watchmakers’ struggle to accept the influences of early stage dementia on his identity and sense of time. Autobiographical works by individuals with dementia inspired this impressionistic film.

QUESTIONS TO EXPLORE: What are common symptoms of dementia? How do doctors diagnose people with dementia? What is the relationship between emotion and memory and how can this be used to treat dementia?

RESOURCES:
Information from the National Institutes of Health on Dementia: https://www.ninds.nih.gov/Disorders/All-Disorders/Prosopagnosia-Information-Page

An explanation of the memory loss which is associated with dementia: https://www.alzheimers.org.uk/site/scripts/documents_info.php?documentID=123

APP  (Click here to watch)
2013, 22 minutes

AGE GROUP: High School *Mature Content Advisory*

STANDARDS: NGSS: Grades 9-12, Engineering Design
(Developing Possible Solutions, ETS1.B)

SUMMARY: Normally, you wouldn’t catch shy software developer Paul at a trendy club. But tonight is different. Paul’s new mobile dating app is ready for beta testing, but if he doesn’t pay his bills by the next day, his "Siri on steroids" will be deleted. Desperate, Paul tracks down suave venture capitalist, Mike, and begs him to invest in his app. Mike takes one look at Paul and devises the perfect plan to put the app to the test: if Paul can use the app to get a date with Zoey, Mike will invest.

QUESTIONS TO EXPLORE: What is an algorithm? How do facial recognition technologies work, and how are they being used? What are the algorithms that govern dating apps based on?

RESOURCES:
How dating apps use data:
https://hbr.org/2022/01/to-make-a-profit-dating-apps-must-leverage-data-differently

THE KING’S PAWN (Click here to watch)
2015, 17 minutes

AGE GROUP: Middle School and higher

STANDARDS: NGSS: Grades 6-12, Engineering Design (Defining and Delimiting Engineering Problems, ETS1.A; Developing Possible Solutions, ETS1.B; Optimizing the Design Solution, ETS1.C)

SUMMARY: The King’s Pawn follows a former chess prodigy who challenges the world-champion with a super computer he spent his life designing. With so much media attention and such high stakes surrounding the event, is it possible that someone from the computer’s side might have interfered with the match’s outcome?

QUESTIONS TO EXPLORE: What defines a turn-taking game and why are those the easiest games to program? What happened in the 1997 Gary Kasparov vs. Deep Blue tournament? What are recent advances in the field of computer versus human gaming?

SPARK  (Click here to watch)
2014, 19 minutes

AGE GROUP: High School

SUMMARY: A young Venezuelan student overcomes censorship in his country and sparks a social-media movement using a cellphone app.

QUESTIONS TO EXPLORE: How do wireless mesh networking apps like Spark work differently than online social networks like Instagram and Twitter? Without an internet connection, how would you seek out current news and information? How have wireless networks been used worldwide during social unrest?

RESOURCES:
Internet usage in Venezuela: https://www.csis.org/analysis/internet-venezuelas-lifeline

Background on government internet shutdowns: https://carnegieendowment.org/2022/03/31/government-internet-shutdowns-are-changing.-how-should-citizens-and-democracies-respond-pub-86687

TECHNOLOGY

TEMMA  [Click here to watch]
2009, 17 minutes

AGE GROUP: Middle School and higher

STANDARDS: NGSS: Grades 6-12, Engineering Design (Developing Possible Solutions, ETS1.B)

SUMMARY: As her body succumbs to a degenerative disease, renowned neuro-programmer Temma Baumgarten tries to complete a computational model of her own mind.

QUESTIONS TO EXPLORE: What are some of the benefits and drawbacks of creating a computerized brain simulation? Why are neuroscientists interested in modeling the human brain?

THREE LIGHT BULBS [Click here to watch]
2012, 15 minutes

AGE GROUP: Middle School and higher

STANDARDS: NGSS: Grades 6-12, Energy (Defining and Delimiting Engineering Problems, ETS1.A); Waves and Their Applications in Technologies for Information Transfer (Energy in Chemical Processes, PS3.D)

SUMMARY: A girl returns to her hometown, which is a remote village in China where most young people have left for big opportunities in the city. The town has a power shortage, which she tries to alleviate by installing a solar panel. However, introducing this new technology proves more difficult than imagined.

QUESTIONS TO EXPLORE: How is electricity produced? How do solar panels draw energy from the sun? What causes power outages? What are the benefits and drawbacks of solar energy?

RESOURCES:
Classroom exercises about electricity: [https://www.fi.edu/sites/default/files/EducatorGuides_edguide-electricity.pdf](https://www.fi.edu/sites/default/files/EducatorGuides_edguide-electricity.pdf)

WITHOUT FIRE  [Click here to watch]  
2012, 20 minutes

AGE GROUP: Middle School and higher

SUMMARY: A young Navajo girl must find a way to heat her home in order to save her asthma-stricken mother from a bitter winter storm.

QUESTIONS TO EXPLORE: How is energy converted into heat? How do solar panels work? In addition to solar energy, what are some ways of producing energy that do not require fossil fuels?

Museum of the Moving Image (MoMI) is the only institution in the United States that deals comprehensively with the art, technology, enjoyment, and social impact of film, television, and digital media. In its acclaimed facility in Astoria, New York, the Museum presents exhibitions; screenings; discussion programs featuring actors, directors, and creative leaders; and education programs. It houses the nation’s largest collection of moving image artifacts and screens over 500 films annually. Its exhibitions—including the core exhibition Behind the Screen and The Jim Henson Exhibition—are noted for their integration of material objects, interactive experiences, and audiovisual presentations. For more information about MoMI, visit movingimage.us.

The Alfred P. Sloan Foundation is a New York–based, philanthropic, not-for-profit institution that makes grants in three areas: research in science, technology, and economics; quality and diversity of scientific institutions; and public engagement with science. Sloan’s program in Public Understanding of Science and Technology, directed by Doron Weber, supports books, radio, film, television, theater and new media to reach a wide, non-specialized audience and to bridge the two cultures of science and the humanities. Sloan’s Film Program encourages filmmakers to create more realistic and compelling stories about science and technology and to challenge existing stereotypes about scientists and engineers in the popular imagination. The Foundation also supports screenplay development programs with the Sundance Institute, SFFILM, Film Independent, the Black List, and the Athena Film Festival. The Sloan Film Program has supported over 750 narrative film projects and has helped develop over 30 feature films. For more information visit sloan.org or follow @SloanPublic on Twitter or Facebook.

Created by Sonia Shechet Epstein, MoMI Curator of Science and Technology. Special thanks to Program Associate Sarah Luciano for her input and assistance. Thanks also to intern Luke McGuire.
